

You trust **X-Cel Specialty Contacts** for your specialty lenses, and we are **proud** to announce we will soon expand our **Myopia Management** category with **REMLens®** for overnight orthokeratology.

Myopia Management Matters

Myopia is the most common refractive error worldwide and is estimated to rise to affect about 50 percent of the global population by the year 2050.*

Higher levels of myopia are associated with vision-threatening complications such as retinal detachment, macular degeneration, cataract, and glaucoma.*

What Can You Expect?

X-Cel Specialty Contacts has been committed to the management of myopia for nearly two decades. The introduction of **REMLens®** is another step forward in our dedication to the myopia management category. With **REMLens®**, you can expect:

- **89% First fit success rate***
- Simplified lens design, and ease of ordering
- Highly adjustable parameters
- Multiple diameter and optic zone options
- Dynamic Edge Profile™ delivers remarkable comfort
- Worry-free refits with **REMLens®** for other leading designs
- Online lens design calculator
- Practice management tools
- 24-hour turnaround time
- Competitive pricing
- Hassle-free, no return warranty
- NCLE certified consultants
